FOUNDATION.

The strategy behind the brand. Mission, story, values, audience, and positioning — the source of truth every other section refers back to.

IF YOU'RE NOT ALREADY FAMOUS, THE SYSTEM *ignores you.*

Every platform monetizes creators after they're valuable. We exist to flip that. We back the climb — the 10K-follower designer, the 30K-stream producer, the 8K subscriber kid in tier-2 India making the best work nobody's seen yet. *We don't help creators go viral. We build the home base that decides who gets to rise.*

— THE STORY

A MARKET BROKEN ON BOTH SIDES.

THE CREATOR SIDE

10 million creators in India. 99% are invisible. Algorithms reward popularity, not potential. YouTube needs 1K subs + 4K hours. Instagram pays nothing. Spotify pays ₹0.003 per stream.

Average time to first ₹1 earned as a creator: **2+ years.**

THE BRAND SIDE

Brands pay ₹50L for a celebrity post that converts at 0.3%. They can't find authentic mid-tier creators. They can't tell who's real and who's bot-padded. 60% say influencer ROI is their #1 problem.

Result: brands overpay. Creators underearn. The market loses on both sides.

WHAT WE SAW

The middle — creators with 10K to 100K followers, 3–8% engagement, zero infrastructure — is the most engaged, most ignored segment in the creator economy. *That's where the ROI lives.* That's our wedge.

— THE WHY

WHY WE EXIST, WHAT WE'RE BUILDING.

MISSION

Give every undiscovered creator the **home base** to be seen, hired, and paid — before the market prices them in.

VISION

A world where being a creator is a legitimate, sustainable career — built on craft and consistency, not luck or virality.

PURPOSE

Invert the timing of the creator economy.
Capture and compound value during the climb,
not after the creator is already expensive.

BRAND PROMISE

**GET DISCOVERED.
GET CONNECTED.
GET PAID.**

— SIX PRINCIPLES

WHAT WE BELIEVE.

01

GROWTH OVER POPULARITY.

A 15K creator with 8% engagement beats a 2M creator with 0.3%. We measure potential, not vanity.

02

YOU OWN THE CLIMB.

Reputation, audience, receipts — they belong to the creator. We don't rent your career back to you.

03

SHOW THE GRIND, NOT JUST THE GLOW.

We tell the truth about how hard this is. No pastel manifest-your-dream-career nonsense.

04

MONEY IS NOT A DIRTY WORD.

Creators should talk about rates, contracts, and margins out loud. We make it normal.

05

BUILT FOR THE UNDERDAWG.

Every product decision: does this help the 10K-100K creator more than the 10M one?

06

NO FAKES. NO SHORTCUTS.

We verify. We escrow. We disclose. Trust is the moat.

— PERSONALITY

REBEL. HERO. CREATOR.

Underdawg is the friend who says “you’re underselling yourself” and opens a spreadsheet to prove it. Not edgy for edginess’s sake — edgy because the truth is.

REBEL

60%

Fights the gatekeepers. Instagram’s algorithm. The “famous-first, paid-second” rule. The whole brand thesis is “the system ignores you; we fix it.”

HERO

30%

Doesn’t just complain about the system — builds the alternative and empowers creators to win inside it.

CREATOR

10%

Quiet but present. Celebrates the craft, the grind, the actual work behind the metrics.

— WHO WE BUILD FOR

THE MID-TIER WEDGE.

PERSONA 01

SOLA, 24 THE MULTI-HYPHENATE

PROFILE

Visual artist + photographer. 12K IG, 5K TikTok. Brooklyn / Bengaluru. Rising tier.

PAIN

Brands DM then ghost. Undersells. 8 disconnected tools. Algorithm tanked her reach.

WISHES FOR

"One place where my career actually lives."

PERSONA 02

ARJUN, 29 THE CAREER-SWITCHER

PROFILE

Ex-corporate designer/podcaster. 30K combined. Tier-2 India. Established tier.

PAIN

Irregular income, no credit. Tax/GST nightmare. Can't tell what actually drives revenue.

WISHES FOR

"A finance + analytics layer for nine-source income."

PERSONA 03

RIYA, 21 THE MICRO-BRAND BUILDER

PROFILE

Fashion + lifestyle, drops merch. 8K IG. College/fresh grad. Emerging tier.

PAIN

80% of revenue eaten by fees. Can't afford a designer. Followers ≠ customers.

WISHES FOR

"AI mockups, a store that builds itself, an email list I own."

— POSITIONING

HOME BASE FOR EMERGING CREATORS.

POSITIONING STATEMENT

For **emerging creators in the 10K–100K mid-tier** — the most engaged, most ignored segment in the creator economy — **Underdawg is the home base** that turns talent into a paid career. Unlike Instagram, Upwork, or LinkedIn (each solves one slice), we hold the whole thing under one roof: discovery, money, audience, and reputation.

B

VERBAL IDENTITY.

How Underdawg sounds in writing — the name, the taglines, the tone, the words we use and the ones we never touch.

— ETYMOLOGY

WHY "UNDERDAWG"

THE DELIBERATE MISSPELLING

A spelling that signals culture — hip-hop, internet-native, lowercase rebellion. *Dawg* is what you call your homie. The brand is **for the dawgs** before it's about them.

UNDER, NOT OVER

Not a brag. Not "Top Creator." We're for the ones *still climbing*. The day a creator becomes "over-dawg," they've graduated — and they didn't get there alone.

THE THESIS, IN ONE WORD

UNDER DAWG.

Underdog — the contender. Boxing slang since the 1880s. The one not expected to win.

-awg — the culture. The dawg in your corner. The crew.

— TAGLINES

LINES THAT TRAVEL.

— TONE

GRITTY. DIRECT. NEVER SHOWING OFF.

VOICE SLIDERS

FOUR ATTRIBUTES, NO EXCEPTIONS

GRITTY

Truth-first. We name what's broken.

WARM

In the creator's corner, not above them.

SMART

We know the numbers. We don't lecture.

CONFIDENT

Underdoggish — punches up at platforms, never down at creators.

— MESSAGING PILLARS

FOUR STORIES, TOLD A THOUSAND WAYS.

01

THE SYSTEM IS RIGGED

Platforms pay creators after they're already expensive. We invert the timing.

02

THE MIDDLE IS THE WEDGE

10K–100K has the engagement. Nobody is building for them.

03

ONE APP, SIX STREAMS

Same creator unlocks subs, merch, gigs, campaigns, management over time.

04

YOU OWN WHAT YOU BUILD

Reputation lives here. Audience migrates from rented to owned.

WRITE LIKE THIS

"Brands overpay. Creators underearn. We fix both."

"If you're not already famous, the system ignores you."

"First income in 30 days. Not 30 months."

NOT LIKE THIS

"Empowering the next generation of digital storytellers through our comprehensive creator-centric ecosystem."

"Unlock your true potential and synergize your influencer journey."

"Welcome, valued user."

REAL ROOMS. REAL HANDS. REAL WORK.

SUBJECT

Creators in their actual workspace — studios, bedrooms, balconies, festival backstage, basement setups. Hands on the work: a paintbrush, a guitar, a camera, a sewing machine, a laptop.

MOOD

Mid-task, mid-thought, never posed. Slight imperfection. The behind-the-scenes shot, not the final glamour.

LIGHT

Hard window light, late afternoon. Strong shadows. A single warm bulb. Never a soft-box studio look.

COLOR TREATMENT

Slight desaturation. Lifted blacks. Warm highlights. Never heavy filters. Never AI-perfect.

YES

Hands stained with ink, a half-eaten samosa in frame.

MOTION.

How the brand moves. Fast, confident, snap-back. Never bouncy. Never showy. Animation is a courtesy — not a performance.

— PRINCIPLES

FOUR RULES. NO EXCEPTIONS.

01

QUICK — NOT JUMPY.

Default duration is 220ms. Under 200ms feels twitchy. Over 350ms feels slow. We use one speed unless we have a reason not to.

02

EASE-OUT, ALMOST ALWAYS.

Elements arrive fast, settle gently. Ease-in (slow start) is reserved for elements *leaving* the screen.

03

NO BOUNCE. NO SPRING.

No overshoot, no rubber-banding. The brand is gritty editorial, not playful SaaS. Motion respects the type.

04

MOTION HAS A REASON.

If it doesn't show state change, hierarchy, or relationship — don't animate it. Decoration is not a use case.
